DISC GOLF

Drive:

- Decide who is going first by flipping a coin or the disc
- The first player stands on the giant slab of concrete, the tee pad.
- Aim for the tee (basket) and toss! Do not step off the tee pad.

Throw from the Lie

- The spot where your disc landed is called the 'lie.'
- If you are playing with a group of people, use a mini disc marker to mark where your disc landed.
- Throw from the lie, making sure your foot does not go past where your disc landed.
- If your disc gets stuck in a tree, DO NOT USE OTHER DISCS to get it out. Use a ball or rock. Where your disc lands when it falls out of the tree, is the lie.
- A treed disc counts as a throw, so if it got stuck during your first throw, un-sticking it is your second throw.

Putting

- Getting your disc into the basket is your only goal at this point!
- Once the disc has made it into the basket, yell "clear" to let the other players know.

How to Score

- Below is an example of our disc golf score card, which can be found in a clear box mounted on the information sign near bathrooms.
- Write every player's name on the scorecard and take turns scoring for each other.
- Write down how many throws it takes for the player to make it into the basket.
- At the end of the 9 holes, add everyone's score. If you are choosing to play 18 holes, this will be your subtotal.
- After the second 9 holes, the final total of both rounds is your final score. The player with the lowest score WINS!
